► About ProFlowers.com

Great Quality

Unlike other floral delivery services, ProFlowers flowers are shipped directly from the growers and are several days fresher than flowers you might find in your local store. We guarantee the composition and quality of our bouquets with a full satisfaction money-back guarantee. We have not found any competitor with a similar commitment, and we believe it is just another way of offering better service to you, our valued customer.

Exceptional Value

Because we ship directly from the growers to you, there is no costly middleman. You are buying flowers at a wholesale rate, and even with the shipping cost, most assortments are 20-30% below comparable retail price and our assortments are fresher, too.

We Appreciate Your Business

Our network of growers and importers represent some of the finest in the country. Our extensive selection process and quality review ensures that all ProFlowers.com growers are "a peak above the rest" in the quality and freshness of their flowers.

You, too can order flowers DIRECT from growers! That's right, cut from the field and into your living room in 24 hours!

Each ProFlowers.com floral assortment is guaranteed to be of the highest quality and to consist of the flowers specified. We have a 100% guarantee on all orders. If the flowers do not arrive in beautiful, fresh condition, we will refund your money.

FOUR STEPS TO LONGER LASTING BOUQUETS

Flowers are an important ingredient in the occasions of our lives, celebrating or commemorating life passages, as well as expressing appreciation of our relationships, achievements and events. Maintaining your precious moments longer through flowers is easy with four steps suggested by the California Cut Flower Commission.

1. Re-cut the end of each stem using a sharp knife or scissors.

This prevents air pockets from forming inside the stems which block water uptake into the flowers. Re-cut every three days or so.
2. Use clean vases or containers.
3. Remove all leaves which will be under water in the vase.

Submerged leaves will rot and create bacteria, shortening the life of your bouquet.
4. Add floral food, obtained in your shipping box, to the vase water.

Use the recommended amount for the size of your bouquet. Change the water (and floral food) every three to four days.
